

Instruction manual for safety mat / Unico

Product Note

You have purchased a high-quality safety mat for indoor and outdoor use. This flooring has been specially developed for outdoor use. It is suitable as a non-slip covering in hallways and arcades, behind counters and in sales rooms, at workplaces as well as on terraces and balconies. In order to enjoy it for a long time and to protect any warranty claims, please observe the following information.

Security

The safety mat does not adhere to existing black ice. On very smooth floors such as marble or polished stone surfaces and on pieces smaller than 3 m², the mat should be fixed to the ground.

Preparation

Clean the surface and remove coarse dirt. Roll out the mat and, if necessary, leave it for 24 hours before cutting it to size.

Care instructions

The mat can be easily swept or shaken out. In heavily soiled, it can be cleaned with a high-pressure cleaner in accordance with the manufacturer's specifications.

Composition

Polyester glass yarn fabric, coated on both sides with special PVC paste, surface sprinkled with PVC granules.
